www.geomagworld.com

SCIENCE
TECHNOLOGY
ENGINEERING
MATHEMATICS

Magnetism lies at the very heart of Geomag, facilitating building, encouraging exploration and creativity and allowing us to produce fun and stimulating platforms that reinforce positive learning.

MAGNETIC BUILDING BLOCKS

Our vocation at Geomagworld is to encourage learning through play with our magnetic construction platforms and the magic of invisible forces.

Inspiration comes directly from teachers who spontaneously over the years have used Geomag products as teaching tools, creating a unique educational experience.

GEOMAG™

**RECYCLED
PLASTIC**

Since our toys are focused on the healthy development of our children, we feel equally responsible for the health and future of the environment that our children are growing up in.

POWERFUL MAGNETS

GEOMAG BOX

We have improved the quality of our magnets and designed a practical storage box made of 100% recycled plastic.

These new lines use selected recycled raw materials, thus minimising the use of natural resources and cutting waste.

THE ORIGINAL MAGNETIC CONSTRUCTION TOYS SINCE 1998

In 1998 we invented the first magnetic construction toy:
simple elements, such as rods and spheres, are held together
by a magical force of attraction to build amazing structures.

Magnetism is key to our philosophy of play and learn.

All our products are **made in Switzerland**

PLAY AND LEARN

Our fun, challenging and engaging play platforms aim to create enthusiastic learners.

Creative and imaginative play for all ages, **encouraging logical thinking** and stimulating resourceful solutions.

Hands-on activities that perfect fine motor skills and hand-eye coordination as well as concentration.

Fun activities that help **literacy and numeracy** in young kids.

Playing together is fundamental as kids develop communication and social skills, such as turn taking, sharing and problem solving.

STEAM learning - our natural partner.

An interdisciplinary approach to **science, technology, engineering, art** and **mathematics** so that kids learn to apply this knowledge to real-life experiences.

Our products have been awarded the STEM TM certification by stem.org.

AGENDA 2030 - OUR SDGs

How can we spend time caring about the healthy development of children and not be responsible for the health and future of the environment they live in?

The answer is: we can't!

For this reason Geomag has made **sustainability** and **social responsibility** the two pillars of our company philosophy.

SUSTAINABLE
DEVELOPMENT
GOALS

QUALITY EDUCATION

Geomag has always cared about the development and education of children, as demonstrated by our **Geomagworld Education** and **School Heroes** projects. The School Heroes play a key role in social and educational projects aimed at promoting the **healthy growth** and education of all the girls and boys and the **development of their personal potential**.

GENDER EQUALITY

Geomag offers **equal opportunities** regardless of gender, and our social projects promote **female empowerment**.

DECENT WORK AND ECONOMIC GROWTH

The word **work** must be associated with **well-being, growth, respect** and **equality**. Since 2013 Geomag has collaborated with a Swiss prison to support the rehabilitation process of inmates.

RESPONSIBLE PRODUCTION AND CONSUMPTION

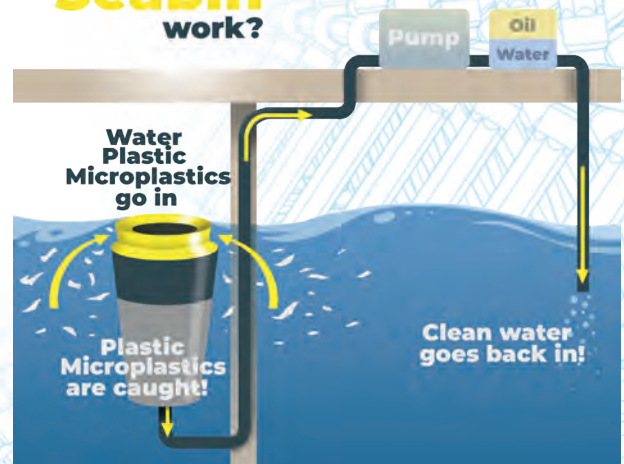

Geomag has embraced the philosophy of the circular economy. Our **Classic, Mechanics** and **Magicube** lines currently use **recycled plastics**. Our **packaging** is also made with **over 70%** recycled materials and our production process uses **100% renewable energy**.

LIFE BELOW WATER

Geomag collaborated with Lifegate by sponsoring the installation of a **Seabin** in Italy in the Ligurian Sea. The Geomag production process **minimizes the dispersion of microplastics**.

How does the **Seabin** work?

ONE MAGNETIC WORLD, THREE PLATFORMS, ALL AGES

In 1998 Geomag invented the Magnetic Construction Toy. Starting out with the original Classic construction system with its magnetic rods and metal spheres, Geomag has now developed 3 platforms, designed around the magic, simplicity and strength of magnets, all with different play activities that cater to all types of intelligence and sensibility.

Although each Geomag magnetic construction platform has its own age target, we have developed products for all ages.

Finally, we have completed our transition to sustainability with the use of recycled plastics for all three of our platforms!

LET THE MAGIC IN!

Magicube is the new range of Geomagworld products that has revolutionised the Junior Construction category. This innovative toy is a building system made up of magnetic cubes that attach to each other on all six sides. By harnessing the invisible and magical properties of magnetism, children can give free rein to their imagination as they build colourful 3D models.

Just playing with a few cubes, even the youngest of children begin to develop their first manual skills. Our new Magicube Recycled collection with 100% recycled plastic has the same bright colours and high quality standards as all our original Geomag sets.

SHAPES

**100%
RECYCLED
PLASTIC**

What started out as the original Magicube system has now become a world of magnetic building blocks with the addition of three new shapes: the half cube, quarter circle and half sphere.

The construction possibilities are boundless and your imagination will fly higher and higher! Characters, animals, structures: you will be surprised how many things you can invent.

But there is more: our desire to create a new magnetic world has gone as far as building vehicles with actual wheels that magnetically attach to the blocks. A simple, magical system, just like all our magnetic constructions at Geomag.

GEOMAG™

LET YOUR IMAGINATION FLY!

With **Geomag Classic**, you can build endless 3D structures, thanks to the magical forces of magnetism, unleashing creativity and imagination as you play. The magnetic rods, steel spheres and panels of different shapes form the magnetic construction system that has made the brand famous all over the world. The Classic range consists of different product lines (**Color, Panels, Rainbow, Spin, Glitter, Pink, Glow**) that, thanks to the panels and different colours, allow you to create bigger and more stable structures, stimulating your curiosity and imagination. Our new Classic Recycled collection with 100% recycled plastic has the same bright colours and high quality standards as all our original Geomag sets.

MECHANICS

GRAVITY & MAGNETIC MOTION

Mechanics is the construction platform that combines the forces of magnetism with a world of mechanical construction, to stimulate creativity, inventiveness and ingenuity. In addition to the classic magnetic rods and steel spheres, Geomag Mechanics adds mechanical elements within the constructions, expanding the play possibilities: some parts of the structures are able to rotate, triggering chain reactions from the magnetic attraction and repulsion. In 2018 the innovative **Mechanics Gravity** platform was launched, consisting of a series of incredible solutions that harness the forces of gravity and magnetism and set the Mechanics models in motion.

LEARNING Sets

Although construction toys are by their very nature educational, Geomag has developed a range of sets designed to help master greater skills and expertise. We have added specific content to our play platforms, thanks to years of collaboration with both teachers and families.

The STEM certification awarded by Stem.org is an endorsement which Geomag is particularly proud of.

SCREEN-FREE
activity for kids

Learning Sets

From years of experience with schools all over the world, we have created a line of products for learning by playing at home using Magicube. Our magnetic cubes form the basic 2D and 3D structures and from there, kids can enter the world of mathematics and language. With the Theatre set, we stage the much-loved fairy tale "The Three Little Pigs".

The Magicube sets stimulate creative free building from as young as six months. The magnetic cubes encourage children to build as the cubes attach on all six sides.

Our new magnetic **Shapes**, with the half cube, quarter circle and half sphere, are an exciting addition to this building system.

With Magicube, children develop visual and manual skills, playing and learning at the same time. The “magic” of magnetism is an exciting discovery and fun, easy building with the cubes ensures reward and results.

Learning Sets

Our “Classic” platform creates a treasure trove of activities that translate classroom explanations into real-life applications. The sets are an effective tool for uniting the class as the students build and experiment, as well as encouraging a hands-on creative approach to learning. The Geomag Education “LAB” sets come in convenient box sets with a rich assortment of contents. They are ideal for both individual and group work, offering a series of STEM activities that stimulate students to work together, ask questions, propose ideas, generate and test solutions.

FOR AGES
5+

GEOMETRY Lab

All the sets contain magnetic rods, steel spheres, plastic panels and activity cards/booklet. There are 3 different sizes: **small** (4 pupils), **medium** (10/12 pupils) and **large** (20/24 pupils).

Pupils can experiment with 2D and 3D geometrical shapes, building, transforming, discussing and working on STEM projects as suggested in the booklet. Suitable for primary schools.

Learning Sets

Mechanics is the construction platform that combines the forces of magnetism with a world of mechanical construction, to stimulate creativity, inventiveness and ingenuity. In addition to the classic magnetic rods and steel spheres, Geomag Mechanics adds mechanical elements within the constructions, expanding the play possibilities: some parts of the structures are able to rotate, triggering chain reactions from the magnetic attraction and repulsion.

FOR AGES
10+

SCIENCE Lab

In the **Science LAB** small recycled set, pupils are introduced to the basic concept of magnetic polarities. They then tailor the polarities to create controlled magnetic reactions and drive motion before progressively tackling more challenging tasks. Science, technology, engineering and mathematics (STEM) are woven into this stimulating and truly innovative set, which includes a set of progressive cards with practical demonstrations and tasks. Each set is for 4 pupils. Suitable for secondary schools

LeArning Sets

Geomag Pro-L is the evolution of the original Geomag magnetic construction system. Designed for those who love a challenge, the Pro-L line allows you to create more complex models and structures thanks to the greater strength of the magnets.

We have built-in visible polarity indicators on each rod, which means you can grasp the full potential of magnetism and build more quickly, pushing the boundaries of the laws of physics.

FOR AGES

Magicube, the magnetic cube construction system, in its version with 6 different coloured sides - to give maximum expression to your creativity. Sophisticated combinations of shapes and colours continually challenge your creativity and your friends'. The most beautiful model can be put on display in your living room until the next time you play: who will be the next artist to win the creativity contest?

You are never too young or too old to play: everyone is invited to take part in the contest and you can be sure of a surprise or two.

Bold architectural shapes and perspectives, abstract forms, fictional characters, plays on colour, illusionism.

Experiment, try and try again: you won't tire of the magic and simplicity of these magnetic cubes!

ADVANCED BUILDING

GEOMAG™ 

CUBE ART

Thanks to sophisticated digital printing technology on plastic, the Magicube cubes can be decorated as if they were a simple sheet of white paper.

As a result, the Geomag designers have been able to enrich the play activities with boundless creativity, adding fun and stimulating themes and characters.

Artists around the world have also recognised the creative potential of this artistic technique and have asked Geomag to create beautiful 2D and 3D works.

CUBE ART 25

Item 058

25 Pcs

Building fanciful images has never been easier and more fun than with our Magicube Mask magnetic cubes.

You will be so surprised at how many wonderful faces and funny expressions you can create with the geometric patterns invented by our designers, purposefully crafted to put no limits on your creativity.

Try to visualize the strangest and most beautiful characters and animals and recreate their faces, expressions and profiles with our Magicube Mask cubes. Guaranteed results! We look forward to seeing your designs.

GROW UP TOGETHER

Geomag Pro-L is the evolution of the original Geomag magnetic construction system. Designed for those who love a challenge, the Pro-L line allows you to create more complex models and structures thanks to the greater strength of the magnets.

We have built-in visible polarity indicators on each rod, which means you can grasp the full potential of magnetism and build more quickly, pushing the boundaries of the laws of physics.
